

P100 Half Mask Respirator

288964
Oct. 2020

NEW!

770983 (small/medium)
770984 (medium/large)

Inside view

Quick Specs

P100 Particulate Filter

- Provides 99.97% filtration of airborne particles and aerosols, both oil-based and non-oil-based

Particles Filtered 0.3 microns and above

Assigned Protection Factor (APF) 10

Certifications NIOSH 42 CFR 84

Weight Including Filters 4.76 oz.

Size Options Small/medium or medium/large

Fit Testing Required for mandatory use

Applications

- Metal working (welding and grinding)
- Construction
- Agricultural
- Stone masonry

Storage Temperature 14–104°F

Shelf Life 5 years

Low-profile design maximizes field of vision and does not interfere with protective eyewear and welding helmets.

Large non-return exhaust valve reduces heat buildup and user fatigue.

Exclusive HEPAC pleated filter design provides additional surface area to reduce breathing resistance while minimizing filter size.

Made with high-grade materials ensuring user it is free of latex and silicone; odor-free and non-allergenic.

Convenient turnbuckles make changing filters easy and quick, reducing downtime.

Ergonomic design allows the user to feel more comfortable and less constricted without compromising the efficiency and effectiveness of the mask.

Protective grill with sleek downward-facing louvers protects the filters from debris and dust.

Integral sample port allows non-destructive quantitative face fit testing of each unit without additional fittings or disposing of the tested unit.

Continuous head and neck strap is anchored at four points for optimal positioning and adjusts for customized fit.
