Resistance Spot Welding

Description

1 Phase

HSW 15 And HSW 25

OWNER’S MANUAL
Thank you and congratulations on choosing Hobart. Now you can get the job done and get it done right. We know you don’t have time to do it any other way.

This Owner’s Manual is designed to help you get the most out of your Hobart products. Please take time to read the Safety precautions. They will help you protect yourself against potential hazards on the worksite. We’ve made installation and operation quick and easy. With Hobart you can count on years of reliable service with proper maintenance. And if for some reason the unit needs repair, there’s a Troubleshooting section that will help you figure out what the problem is. The parts list will then help you to decide the exact part you may need to fix the problem. Warranty and service information for your particular model are also provided.

Hobart Welders manufactures a full line of welders and welding related equipment. For information on other quality Hobart products, contact your local Hobart distributor to receive the latest full line catalog or individual catalog sheets. To locate your nearest distributor or service agency call 1-877-Hobart1.

OPTIONS AND ACCESSORIES

WARRANTY
SECTION 1 – SAFETY PRECAUTIONS - READ BEFORE USING

1-1. Symbol Usage

Means Warning! Watch Out! There are possible hazards with this procedure! The possible hazards are shown in the adjoining symbols.

▲ Marks a special safety message.

☐ Means "Note"; not safety related.

This group of symbols means Warning! Watch Out! possible ELECTRIC SHOCK, MOVING PARTS, and HOT PARTS hazards. Consult symbols and related instructions below for necessary actions to avoid the hazards.

1-2. Resistance Spot Welding Hazards

▲ The symbols shown below are used throughout this manual to call attention to and identify possible hazards. When you see the symbol, watch out, and follow the related instructions to avoid the hazard. The safety information given below is only a summary of the more complete safety information found in the Safety Standards listed in Section 1-5. Read and follow all Safety Standards.

▲ Only qualified persons should install, operate, maintain, and repair this unit.

▲ During operation, keep everybody, especially children, away.

SPOT WELDING can cause fire.

Sparks can fly off from the weld. The flying sparks, hot workpiece, and hot equipment can cause fires, burns, and explosions.

- Protect yourself and others from flying sparks and hot metal.
- Do not spot weld where flying sparks can strike flammable material.
- Remove all flammables within 35 ft (10.7 m) of the weld. If this is not possible, tightly cover them with approved covers.
- Be alert that welding sparks can easily go through small cracks and openings to adjacent areas.
- Watch for fire, and keep a fire extinguisher nearby.
- Do not spot weld on closed containers such as tanks or drums.
- Do not weld where the atmosphere may contain flammable dust, gas, or liquid vapors (such as gasoline).
- Remove any combustibles, such as a butane lighter or matches, from your person before doing any welding.
- After completion of work, inspect area to ensure it is free of sparks, glowing embers, and flames.
- Do not exceed the equipment rated capacity.
- Use only correct fuses or circuit breakers. Do not oversize or bypass them.

FLYING SPARKS can cause injury.

Very often sparks fly off from the joint area.

- Wear approved face shield or safety goggles with side shields.
- Wear protective garments such as oil-free, flame-resistant leather gloves, heavy shirt, cuffless trousers, high shoes, and a cap. Synthetic material usually does not provide such protection.
- Protect others in nearby areas by using approved flame-resistant or noncombustible fire curtains or shields. Have all nearby persons wear safety glasses with side shields.

ELECTRIC SHOCK can kill.

Touching live electrical parts can cause fatal shocks or severe burns. The input power circuit and machine internal circuits are also live when power is on. Incorrectly installed or improperly grounded equipment is a hazard.

- Do not touch live electrical parts.
- Wear dry, hole-free insulating gloves and body protection.
- Disconnect input power before installing or servicing this equipment. Lockout/tagout input power according to OSHA 29 CFR 1910.147 (see Safety Standards).

HOT METAL can cause burns.

Wear gloves or allow cooling period before servicing tongs or tips.

- Always wear welding-type, insulated gloves when using this equipment.
- Do not touch workpiece, tips, or tongs with bare hands.
- Allow tongs and tips to cool before touching.
The tong tips, tongs, and linkages move during operation.

- Keep away from moving parts.
- Keep away from pinch points.
- Do not put hands between tips.
- Keep all guards and panels securely in place.
- OSHA and/or local codes may require additional guarding to suit the application.

FUMES can be hazardous.

- Coatings, cleaners, paints, and platings can produce fumes when welded. Breathing these fumes can be hazardous to your health.
- Do not breathe the fumes.
- If inside, ventilate the area and/or use exhaust at the weld to remove fumes.
- In confined spaces, use an approved air-supplied respirator.
- Do not weld on coated metals, such as galvanized, lead, or cadmium plated steel, unless the coating is removed from the weld area, the area is well ventilated, or if necessary, while wearing an air-supplied respirator. The coatings and any metals containing these elements can give off toxic fumes if welded.
- Read the Material Safety Data Sheets (MSDSs) and the manufacturer’s instructions for metals, coatings, and cleaners.

1-3. Additional Symbols For Installation, Operation, And Maintenance

FIRE OR EXPLOSION hazard.

- Do not install or place unit on, over, or near combustible surfaces.
- Do not install or operate unit near flammables.
- Do not overload building wiring – be sure power supply system is properly sized, rated, and protected to handle this unit.

FLYING METAL or DIRT can injure eyes.

- Wear approved safety glasses with side shields or wear face shield.

MAGNETIC FIELDS can affect pacemakers.

- Pacemaker wearers keep away.
- Wearers should consult their doctor before going near resistance spot welding operations.

OVERUSE can cause OVERHEATING.

- Allow cooling period; follow rated duty cycle.
- Reduce duty cycle before starting to weld again.

1-4. California Proposition 65 Warnings

- Welding or cutting equipment produces fumes or gases which contain chemicals known to the State of California to cause birth defects and, in some cases, cancer. (California Health & Safety Code Section 25249.5 et seq.)
- Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Wash hands after handling.

- Engine exhaust contains chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.
- Diesel engine exhaust and some of its constituents are known to the State of California to cause cancer, birth defects, and other reproductive harm.

1-5. Principal Safety Standards

Safety in Welding and Cutting, ANSI Standard Z49.1, from American Welding Society, 550 N.W. LeJeune Rd, Miami FL 33126

National Electrical Code, NFPA Standard 70, from National Fire Protection Association, Batterymarch Park, Quincy, MA 02269.

Safe Practices For Occupation And Educational Eye And Face Protection, ANSI Standard Z87.1, from American National Standards Institute, 1430 Broadway, New York, NY 10018.

Cutting And Welding Processes, NFPA Standard 51B, from National Fire Protection Association, Batterymarch Park, Quincy, MA 02269.

1-6. EMF Information

Considerations About Welding And The Effects Of Low Frequency Electric And Magnetic Fields

Welding current will cause electromagnetic fields. There has been and still is some concern about such fields. However, after examining more than 500 studies spanning 17 years of research, a special blue ribbon committee of the National Research Council concluded that: “The body of evidence, in the committee’s judgment, has not demonstrated that exposure to power-frequency electric and magnetic fields is a human-health hazard.” However, studies are still going forth and evidence continues to be examined.
SECTION 2 – CONSIGNES DE SÉCURITÉ – LIRE AVANT UTILISATION

2-1. Signification des symboles

⚠️ Signifie Mise en garde ! Soyez vigilant ! Cette procédure présente des risques de danger ! Ceux-ci sont identifiés par des symboles adjacents aux directives.

▲ Identifie un message de sécurité particulier.

▏ Signifie NOTA ; n'est pas relatif à la sécurité.

2-2. Dangers liés au soudage par points

▲ Les symboles représentés ci-dessous sont utilisés dans ce manuel pour attirer l’attention et identifier les dangers possibles. Lorsque vous rencontrez un symbole, prenez garde et suivez les instructions afférentes pour éviter tout risque. Les instructions en matière de sécurité indiquées ci-dessous ne constituent qu’un sommaire des instructions de sécurité plus complètes fournies dans la norme de sécurité énumérées dans la Section 2-4. Lisez et observez toutes les normes de sécurité.

▲ Seul un personnel qualifié est autorisé à installer, faire fonctionner, entretenir et réparer cet appareil.

▲ Pendant le fonctionnement, maintenez à distance toutes les personnes, notamment les enfants de l’appareil.

LE SOUDAGE PAR POINTS peut provoquer un incendie.

Des étincelles peuvent être projetées de la soudure. La projection d’étincelles ainsi que les pièces et équipements chauds peuvent provoquer des incendies, des brûlures et des incendies.

- Protégez-vous, ainsi que toute autre personne travaillant sur les lieux, contre les étincelles et le métal chaud.
- Ne touchez pas par points dans un endroit où des étincelles peuvent tomber sur des substances inflammables.
- Déplacez toute matière inflammable se trouvant dans un périmètre de 10 m de la pièce à souder. Si cela est impossible, couvrez-les de housses approuvées et bien ajustées.
- Des étincelles du soudage peuvent facilement passer dans d’autres zones en traversant de petites fissures et des ouvertures.
- Afin d’éliminer tout risque de feu, soyez vigilant et gardez toujours un extincteur à portée de main.
- Ne soyez pas par points sur un récipient fermé tel un réservoir ou un bidon.
- Ne soyez pas si l’air ambiant est chargé de particules, gaz, ou vapeurs inflammables (vapeur d’essence, par exemple).
- Avant de souder, retirez toute substance combustible de vos vêtements, de vos poches telles qu’un briquet au butane ou des allumettes.
- Une fois le travail achevé, assurez-vous qu’il ne reste aucune trace d’étincelles incandescentes ni de flammes.
- Ne dépassez pas la puissance permise de l’équipement.
- Ne laissez pas le poste sous tension.
- Ne touchez pas aux pièces électriques sous tension.
- Portez un équipement de protection: gants en cuir résistant au feu, vêtements de protection secs et sans trous.

LES ÉTINCELLES VOLANTES risquent de provoquer des blessures.

Des étincelles peuvent jaillir de la soudure.

- Portez une visière ou des lunettes de sécurité avec des écrans latéraux approuvées.
- Portez un équipement de protection: gants en cuir résistant au feu, vêtements de protection latéraux approuvées.
- Protegez-vous contre les éclats de brûlures des étincelles volantes.
- Utilisez exclusivement des fusibles ou coupe-circuits appropriés. Ne pas augmenter leur puissance; ne pas les jongler.

UNE DÉCHARGE ÉLECTRIQUE peut entraîner la mort.

Le fait de toucher à une pièce électrique sous tension peut donner une décharge fatale ou entraîner des brûlures graves. L’alimentation d’entrée et les circuits internes de l’appareil sont également actifs lorsque le poste est sous tension. Un poste incorrectement installé ou inadéquatement mis à la terre constitue un danger.

- Ne touchez pas aux pièces électriques sous tension.
- Portez des gants isolants et des vêtements de protection secs et sans trous.

LE MÉTAL CHAUD peut provoquer des brûlures.

Portez des gants ou laissez refroidir les électrodes avant de procéder à l’entretien.

- Portez toujours de gants de soudeur lorsque vous utilisez cet équipement.
- Ne touchez pas les pièces ni les électrodes avec les mains.
- Laissez les électrodes refroidir avant de les toucher.

Ce groupe de symboles signifie Mise en garde ! Soyez vigilant ! Il y a des risques de danger reliés aux CHOCS ÉLECTRIQUES, aux PIÈCES EN MOUVEMENT et aux PIÈCES CHAUDES. Reportez-vous aux symboles et aux directives ci-dessous afin de connaître les mesures à prendre pour éviter tout danger.
 raises concerns on the effects of low-frequency electromagnetic fields. Even if they are performed by very high-quality work, the results are complex. This scientific approach does not allow us to establish a coherent overview. Worst of all, it does not allow us to draw final conclusions concerning the possible risks. In addition, it is not possible to deduce the measures to take to reduce or eliminate the possible risks.

### 2-3. Dangers supplémentaires en relation avec l’installation, le fonctionnement et la maintenance

**Risque D’INCENDIE OU D’EXPLOSION.**
- Ne pas placer l’appareil sur, au-dessus ou à proximité de surfaces inflammables.
- Ne pas installer ni faire fonctionner l’appareil à proximité de substances inflammables.
- Ne pas surcharger l’installation électrique – s’assurer que l’alimentation est correctement dimensionnée et protégée avant de mettre l’appareil en service.

**LA CHUTE DE L’ÉQUIPEMENT peut blesser.**
- Utiliser un engin d’une capacité appropriée pour soulever l’appareil.
- Faites déplacer les équipements portables par deux personnes dotées d’une force suffisante.
- Durant le transport, immobilisez l’appareil pour éviter qu’il ne bascule.

**DES PIÈCES DE MÉTAL ou DES SALETÉS peuvent provoquer des blessures aux yeux.**
- Porter des lunettes de sécurité à coques latérales ou un écran facial.

**LES CHAMPS MAGNÉTIQUES peuvent affecter les stimulateurs cardiaques.**
- Porteurs de stimulateur cardiaque, restez à distance.
- Les porteurs d’un stimulateur cardiaque doivent d’abord consulter leur médecin avant de s’approcher des opérations de soudage par points.

**L’EMPLOI EXCESSIF peut SURCHAUFFER L’ÉQUIPEMENT.**
- Prévoir une période de refroidissement; respecter le cycle opératoire nominal.
- Réduire le facteur de marche avant de poursuivre le soudage.

### 2-4. Principales normes de sécurité

*Safety in Welding and Cutting*, norme ANSI Z49.1, de l’American Welding Society, 550 N.W. Lejeune Rd, Miami FL 33126

### 2-5. Information sur les champs électromagnétiques

Données sur le soudage électrique et sur les effets, pour l’organisme, des champs magnétiques basse fréquence

SECTION 4 − INSTALLATION

4-1. Installing Or Dressing Tips

A. Installing Tips

1. Threaded Tip
2. Tip With Hexhead Screw
3. Tong

Coat threads with supplied heat sink compound and install tip onto tong. Do not overtighten.

Tools Needed:

- 3/16 in
- 9/16 in

Ref. ST-800 155-B / Ref. ST-800 154
B. Dressing The Tips

1 New Tip
2 Used Tip Requiring Dressing
3 Dressing Method – Keep top diameter same as a new tip.

Tools Needed:

\[ d = \frac{1}{8} \text{ in} (3.2 \text{ mm}) \]
for 1.5 kVA models;
\[ \frac{5}{32} \text{ in} (4 \text{ mm}) \]
for 2.5 kVA models
4-2. Installing Or Cleaning Tongs

⚠️ Turn off and unplug welder.

⚠️ Be sure tong ends are clean and not corroded before installing. Clean tongs with fine steel wool.

**Bottom Tong:**
1. Bottom Tong
2. Hole In Spatter Guard
3. Bottom Tong Securing Screws (4)

Loosen the four screws. If needed, use a rubber mallet to loosen tong.

Slide tong into bottom tong holder as far as possible, and position so that tip is pointing straight up.

Loosely tighten screws.

**Top Tong:**
4. Top Tong
5. Top Tong Holder/Pivot Casting
6. Top Tong Securing Screws (4)

Loosen the four screws. If needed for removal, use a rubber mallet to loosen tong.

Slide tong into pivot casting as far as necessary, so that tip mates with bottom tip when tongs are closed.

Loosely tighten screws.

7. Tips

Adjust tong positions to line up centers of tips as shown. Tighten screws.

---

Tools Needed:

- 3/16 in
- 9/16 in
- Fine Steel Wool

---

ST-800 155-A / Ref. ST-800 154-A
4-3. Adjusting Tong And Hand Lever Pressure

TURN OFF AND UNPLUG WELDER.

EXCESSIVE TONG PRESSURE CAN DAMAGE TIPS. DO NOT USE TONGS AS A CLAMP OR VICE TO HOLD WORKPIECE TOGETHER. IF THE TWO PIECES OF MATERIAL TO BE WELDED DO NOT MAKE GOOD CONTACT AT THE POINT OF THE INTENDED WELD, CLAMP MATERIAL TO PROVIDE GOOD CONTACT BETWEEN SURFACES.

* TONG PRESSURE IS ADJUSTABLE, AND MUST BE CHECKED AND/OR SET BEFORE OPERATION. CORRECT TONG PRESSURE IS NECESSARY TO CREATE A QUALITY WELD AND TO PREVENT DAMAGE TO TIPS.

TOO MUCH TONG PRESSURE CAUSES THE WELD NUGGET TO Dimple AND MATERIAL TO SPLASH OUT AROUND THE NUGGET AREA. IF TONG PRESSURE IS TOO WEAK, PARTS ARE LOOSE WHEN THE TONGS CLOSE, SEVERE ARCING OCCURS BETWEEN WORKPIECES, AND NO WELD CAN BE MADE.

1. Front Nut
2. Rear Nut
3. Pivot Casting
4. Hand Lever
5. Tongs

TO INCREASE TONG PRESSURE, LOOSEN FRONT NUT. THE FARTHER THE FRONT NUT IS TURNED OUT, THE GREATER THE PRESSURE ON THE TIPS WHEN THE HAND LEVER IS CLOSED. TURN THE REAR NUT UP TO THE PIVOT CASTING TO LOCK THE POSITION.

TO DECREASE TONG PRESSURE, LOOSEN THE REAR NUT AND TURN THE FRONT NUT UP TO THE PIVOT CASTING.

6. Machine Screw

THE FARTHER DOWN THE SCREW IS TURNED, THE FARTHER THE HAND LEVER WILL CLOSE. ADJUSTMENT OF THIS SCREW WILL DETERMINE IF THE TONGS LOCK ON THE MATERIAL, OR JUST PULL UP TIGHT. ADJUST SCREW TO ALLOW LEVER TO BE RAISED EASILY AFTER THE WELD HAS BEEN COMPLETED.

7. Hex Nut

TO ADJUST PRESSURE NEEDED TO PUSH DOWN HAND LEVER, TURN THE HEX NUTS LOCATED ON EACH SIDE OF THE PIVOT CASTING.

TOOLS NEEDED:

9/16, 11/16 in
4-4. Installing Handle

- Turn off and unplug welder.

1. Wooden Handle
2. Handle Bolt
3. Brackets (15, 15T Models Only)

Install handle onto the spot welder as shown above. For 25 and 25T Models, install handle onto either side as desired for either right-hand or left-hand use.

Tools Needed:
- 7/16, 3/8 in

⚠️ Turn off and unplug welder.
1. Wooden Handle
2. Handle Bolt
3. Brackets (15, 15T Models Only)

Ref. ST-802 056-A
4-5. Connecting Input Power

Input power supply wiring and receptacle must meet National Electrical Code and all other code requirements.

Operate spot welder from a separately fused or circuit breaker protected circuit, and use correct size input conductors.

1. Rating Label
2. Cord
3. Parallel Plug On 110 Volts AC Models
4. Tandem Plug On 220 Volts AC Models
5. Grounded Receptacle

Connect plug to matching grounded receptacle.

SECTION 5 – OPERATION

5-1. Controls

1. Hand Lever
   Use lever to open and close tongs. Close the hand lever during the welding process to compress the material between the tips. To adjust tong pressure, see Section 4-3.

2. Start Switch
   Use switch to turn weld current On and Off. Move switch sideways in either direction to start weld current. Release switch to stop weld current.

ST-145 104-A
SECTION 6 – MAINTENANCE AND TROUBLESHOOTING

6-1. Routine Maintenance

Limited Warranty - Subject to the terms and conditions below, Hobart/Miller Electric Mfg. Co., Appleton, Wisconsin, warrants to its original retail purchaser that new Hobart equipment sold after the effective date of this limited warranty is free of defects in material and workmanship at the time it is shipped by Hobart. This warranty is expressly in lieu of all other warranties, express or implied, including the warranties of merchantability and fitness.

Within the warranty periods listed below, Hobart/Miller will repair or replace any warranted parts or components that fail due to such defects in material or workmanship. Hobart/Miller must be notified in writing within thirty (30) days of such defect or failure, at which time Hobart/Miller will provide instructions on the warranty claim procedures to be followed. Hobart/Miller shall honor warranty claims on warranted equipment listed below in the event of such a failure within the warranty time periods. All warranty time periods start on the date that the equipment was delivered to the original retail purchaser, or one year after the equipment is sent to a North American distributor or eighteen months after the equipment is sent to an International distributor.

1. 5 Years — Parts and Labor
   * Original Main Power Rectifiers
   * Transformers
   * Stabilizers
   * Reactors

2. 3 Years — Parts and Labor
   * Drive Systems
   * PC Boards
   * Rotors, Slators and Brushes
   * Idle Module
   * Solenoid Valves
   * Switches and Controls
   * Spot Welder Transformer

3. 1 Year — Parts and Labor Unless Specified (90 days for industrial use)
   * Motor-Driven Guns
   * MIG Guns/TIG Torches
   * Relays
   * Contactors
   * Regulators
   * Water Coolant Systems
   * Flowgauge and Flowmeter Regulators (No Labor)
   * HF Units
   * Running Gear/Trailers
   * Plasma Cutting Torches
   * Remote Controls
   * Replacement Parts (No labor)
   * Accessories
   * Field Options
   (NOTE: Field options are covered for the remaining warranty period of the product they are installed in, or for a minimum of one year — whichever is greater.)

4. Engines, batteries and tires are warranted separately by the manufacturer.

Hobart’s 5/3/1 Limited Warranty shall not apply to:

1. Consumable components such as contact tips, cutting nozzles, slip rings, drive rolls, gas diffusers, plasma torch tips and electrodes, weld cables, and tongs and tips, or parts that fail due to normal wear. (Exception: brushes, slip rings, and relays are covered on Hobart Engine-Driven models.)

2. Items furnished by Hobart/Miller, but manufactured by others, such as engines or trade accessories. These items are covered by the manufacturer’s warranty, if any.

3. Equipment that has been modified by any party other than Hobart/Miller, or equipment that has been improperly installed, improperly operated or misused based upon industry standards, or equipment which has not had reasonable and necessary maintenance, or equipment which has been used for operation outside of the specifications for the equipment.

Hobart products are serviced by Hobart or Miller Authorized Service Agencies.

HOBART PRODUCTS ARE INTENDED FOR PURCHASE AND USE BY COMMERCIAL/INDUSTRIAL USERS AND PERSONS TRAINED AND EXPERIENCED IN THE USE AND MAINTENANCE OF WELDING EQUIPMENT.

In the event of a warranty claim covered by this warranty, the exclusive remedies shall be, at Hobart's/Miller's option: (1) repair; or (2) replacement; or, where authorized in writing by Hobart/Miller in appropriate cases, (3) the reasonable cost of repair or replacement at an authorized Hobart/Miller service station; or (4) payment of or credit for the purchase price (less reasonable depreciation based upon actual use) upon return of the goods at customer's risk and expense, Hobart’s/Miller's option of repair or replacement will be F.O.B., Factory at Appleton, Wisconsin, or F.O.B. at a Hobart/Miller authorized service facility as determined by Hobart/Miller. Therefore no compensation or reimbursement for transportation costs of any kind will be allowed.

TO THE EXTENT PERMITTED BY LAW, THE REMEDIES PROVIDED HEREIN ARE THE SOLE AND EXCLUSIVE REMEDIES. IN NO EVENT SHALL HOBART/MILLER BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING LOSS OF PROFIT), WHETHER BASED ON CONTRACT, TORT OR ANY OTHER LEGAL THEORY.

ANY EXPRESS WARRANTY NOT PROVIDED HEREIN AND ANY IMPLIED WARRANTY, GUARANTEE OR REPRESENTATION AS TO PERFORMANCE, AND ANY REMEDY FOR BREACH OF CONTRACT TORT OR ANY OTHER LEGAL THEORY WHICH, BUT FOR THIS PROVISION, MIGHT ARISE BY IMPLICATION, OPERATION OF LAW, CUSTOM OF TRADE OR COURSE OF DEALING, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE, WITH RESPECT TO ANY AND ALL EQUIPMENT FURNISHED BY HOBART/MILLER IS EXCLUDED AND DISCLAIMED BY HOBART/Miller.

Some states in the U.S.A. do not allow limitations of how long an implied warranty lasts, or the exclusion of incidental, indirect, special or consequential damages, so the above limitation or exclusion may not apply to you. This warranty provides specific legal rights, and other rights may be available, but may vary from state to state.

In Canada, legislation in some provinces provides for certain additional warranties or remedies other than as stated herein, and to the extent that they may not be waived, the limitations and exclusions set out above may not apply. This Limited Warranty provides specific legal rights, and other rights may be available, but may vary from province to province.
